

Topcon introduces new 10-inch touchscreen display for construction machine control

LIVERMORE, Calif., USA/ CAPELLE A/D IJSSEL, The Netherlands March 7, 2017 Topcon Positioning Group announces the release of the latest addition to its longstanding line of touchscreen control boxes for construction machine automation – the GX-75. With its 10-inch touch screen, the system is designed to offer a large and easy-to-use display for operators.

The GX-75 is the largest touchscreen display for Topcon construction machine control ever developed. The 10-inch, bright, rugged and sunlight-readable screen allows operators in the cab to see more of the project file, at once, in practically any weather condition.

The GX-75 is also compatible with Topcon's [Sitelink3D](#) monitoring and management service to instantly communicate job site progress to the office in real time, as well as quickly upload data to the office.

The GX-75 is currently available for use with dozer, motor grader and excavator machine control systems. It comes with a standard lock connector used with previous Topcon control boxes, allowing for backward compatibility.

The GX-75 also features a standard lock connector used with previous Topcon control boxes, allowing for backward compatibility.

The GX-75 includes an adjustable mounting backpack designed to provide versatility – whether an operator prefers to view project information on the left, right or center of the cab.

Additional features include integrated virus protection, and easily-accessible USB ports for saving and downloading job files.
